## Ohio Superfund

As-it-happens update · April 17, 2018

NEWS

[With a few changes, Duke Energy refiles application for high-pressure natural gas pipeline in SW ...](#)

Cincinnati.com

Duke says the pipeline is necessary "to ensure the safe and reliable delivery of natural gas to its customers in Southwest **Ohio** for decades to come." The project ... That included the pipeline's proximity to the Pristine Inc. site, a former liquid waste disposal facility in Reading on the federal **Superfund** list.

Mr. Olberding,

Good afternoon. David Linnear and I received your email and letter requesting a response from the U.S. EPA regarding the proposed Central Corridor Pipeline Project near the Pristine Inc. Superfund Site. U.S. EPA will review your request and provide an answer in the near future.

Regards,

***Adrian Palomeque***

Here's GHD's issue and Henry's contact information . . .

David, there are inaccuracies in the drawing with respect to the configuration of the Pristine piping and extraction wells. We think it is best if Duke contact us (Henry Cooke) directly to address the inaccuracies. We also request that we be notified when any work is being done such that we can observe the work to ensure the Pristine infrastructure is not being impacted. Henry's phone number is 513-285-1107.

**Date:** Tuesday, February 20, 2018 3:00:16 PM

---

David,

FYI - This afternoon I received a phone call from Julie Shooker (513-313-0646) who mentioned that she works as a consultant for Duke Energy. She called in reference to the Pristine Inc. Superfund Site in Reading, Ohio.

She said that they are planning to install a gas pipe line 13 miles long, just east of the railroad that is parallel to the Pristine property. She said the trench to place the pipeline will be an open trench approximately 8 to 10 ft. in depth.

She said that because of the "shallowness" of the installation it would not have an impact on the groundwater contaminated associated with the site. She said that they would like to request that U.S. EPA doesn't get involved in the project. She said she will send you and me a letter with this request sometime this week via mail and also send us a copy of the letter via email.

Adrian

David,

Thanks for the opportunity to provide input on the Duke proposed pipeline. I understand a similar request was sent to Julian Hayward. To prevent potential confusion, Julian will send you the "official" response from the Pristine Trust later today. That response will reiterate the concern the Trust expressed to you during our meeting earlier this month, specifically, the concern with the proposed pipeline's close proximity to the off-site extraction wells infrastructure. The Trust is not opposed to the pipeline, but protection of, and accessibility to, the Trust's off-site pumping and monitoring infrastructure must be maintained.

Ron

Mr. Linnear / Mr. Palomeque: The attached correspondence outlines Duke Energy Ohio's assessment that the proposed Central Corridor Pipeline Project (Ohio Power Siting Board Case No. 16-0253-GA-BTX) will not have negative effects on the Pristine Inc. Superfund site at 410 Cavett Avenue in Reading, Ohio. Duke Energy Ohio is requesting a response from USEPA concerning this property. If you need additional information concerning the project, the docket in the case can be found at the following link: <http://dis.puc.state.oh.us/CaseRecord.aspx?Caseno=16-0253&link=DIVA>

Please contact me if you have questions.

Thank You

Mr. Olberding,

Good morning. David Linneear and I received your email and letter requesting a response from the U.S. EPA regarding the proposed Central Corridor Pipeline Project near the Pristine Inc. Superfund Site. U.S. EPA will review your request and provide an answer in the near future.

Regards,

**Adrian Palomeque**

---

David,

Thanks for sending this to us. Based on review of the information provided and discussion with the Trustees, our comments are as follows.

We would like to see a map of the proposed route in order to better understand the request. Our current understanding is that the proposed route has a minimum 100 feet separation and hence it does not pass through the Pristine site nor the on-site remediation system. However, the proposed route is in close proximity to Pristine's off-site extraction wells and buried infrastructure in the area south of the site, and appears to cross our buried forcemain in multiple locations. We are concerned about possible interference during construction and future accessibility to our forcemain and wells for maintenance purposes. We will also have to review the proposed route relative to the location of existing monitoring wells.

Please let me know if you have any questions.

Regards,

**Julian Hayward**
